

AMENDMENTS TO THE CLAIMS

The Listing of Claims below replaces all prior versions, and listings, of claims in this application. Claims 13 and 15 have been canceled and claims 3 and 21-23 have been amended.

Listing of Claims:

Claim 1. (Original) A computer system useful for evaluating trading interests, comprising: a buyer terminal having an output device for presenting offerings of the interests and an input device for entering one or more investment criteria; and a computer coupled to the buyer terminal, a data store coupled to the computer including offerings of a plurality of trading parties, the computer including programming for selectively identifying from the data store offerings of the plurality of trading parties responsive to the investment criteria, the computer providing information related to identified offerings responsive to the investment criteria of all trading parties for presentation together on the output device.

Claim 2. (Original) The computer system as set forth in claim 1, wherein the computer provides to the output device a presentation, in an integrated fashion, of information related to identified offerings of at least two of the plurality of trading parties.

Claim 3. (Currently Amended) The computer system as set forth in claim 1, wherein the computer provides to the output device a presentation of information related to identified offerings in a summary view, ~~the summary view including a count of responsive offerings of each of the plurality of trading parties.~~

Claim 4. (Original) The computer system as set forth in claim 3, wherein responsive to a selection entered via said input device identifying a trading party presented in the summary view, the computer provides a listing of all offerings from the data store of the one selected trading party for presentation on the output device.

Claim 5. (Original) The computer system as set forth in claim 1, wherein the investment criteria includes buyer-defined values for terms of the offerings.

Claim 6. (Original) The computer system as set forth in claim 1, wherein the investment criteria includes buyer-defined values for at least one of maturity, size, yield, credit ratings and trading party of the offerings.

Claim 7. (Original) The computer system as set forth in claim 1, wherein the investment criteria includes parameters that specify an order for presenting offerings information retrieved from the data store.

Claim 8. (Original) The computer system as set forth in claim 1, wherein the computer system includes memory for storing the investment criteria, the computer upon command selectively identifying the offerings in the data store based on investment criteria stored in the memory.

Claim 9. (Original) The computer system as set forth in claim 1, where the computer

comprises programming for selectively granting buyers authority to view offerings of the trading parties, and for selectively preventing retrieval and display of offerings to unauthorized buyers.

Claim 10. (Original) The computer system as set forth in claim 1, wherein the computer comprises programming for selectively granting buyers authority to execute offerings of dealers.

Claim 11. (Original) The computer system as set forth in claim 1, wherein the computer comprises programming for selectively limiting access to offerings of predetermined ones of the plurality of trading parties.

Claim 12. (Original) In a computer system for trading interests including a plurality of buyer terminals having an output device and an input device, and a central computer linked to the buyer terminals by a communication system, the improvement comprising a data store coupled to the central computer including offerings of a plurality of trading parties, the central computer including programming for selectively identifying from the data store offerings of a plurality of trading parties responsive to at least one investment criterion entered via an input device of a buyer terminal, the central computer transmitting to the buyer terminal for presentation on the output device the information related to identified offerings of each trading party having an offering responsive to the at least one investment criterion..

Claim 13. (Canceled)

Claim 14. (Original) A method for evaluating trading interests, comprising: entering at least one investment criterion into a computer system in which are stored trading interests of a plurality of parties; retrieving information relating to offerings of the interests from a plurality of trading parties responsive to the at least one investment criterion; and presenting, in an integrated fashion, the retrieved offerings information of the plurality of trading parties.

Claim 15. (Canceled)

Claim 16. (Original) The method as set forth in claim 14, comprising; sorting the retrieved offerings information in accordance with sorting information included within the investment criteria, wherein the step of presenting includes presenting the retrieved offerings information in the sorting information.

Claim 17. (Original) The method as set forth in claim 14, comprising storing entered investment criteria and upon request, retrieving the stored investment criteria and applying the retrieved investment criteria to again retrieve offerings of the plurality of dealers.

Claim 18. (Currently Amended) The method as set forth in claim ~~13~~14, comprising a trading party granting authority to a buyer to view offerings information of the trading

party and preventing retrieval and display of offerings information of the trading party to unauthorized buyers.

Claim 19. (Currently Amended) The method as set forth in claim ~~13~~14, in combination with a method for trading offerings, comprising the step of a trading party granting authority to a buyer to execute offerings of that trading party.

Claim 20. (Currently Amended) The method as set forth in claim ~~13~~14, comprising the step of a buyer limiting that buyer's access to offerings of predetermined ones of the plurality of trading parties.

Claim 21. (Currently Amended) A method for electronically evaluating offerings of interests, comprising: entering one or more investment criteria into a computer system in which are stored trading interests of a plurality of parties; identifying offerings of the interests from a plurality of trading parties responsive to the investment criteria on a party by party basis; and presenting information relating to identified offerings of each of the plurality of trading parties in an integrated fashion on a party by party basis.

Claim 22. (Currently Amended) A method for electronically evaluating interests, comprising: entering one or more investment criteria into a computer system in which are stored trading interests of a plurality of parties, the investment criteria including presentation preferences; identifying offerings of the interests from a plurality of trading parties responsive to the investment criteria; and presenting information related to

identified offerings of each of the plurality of trading parties in an order responsive to the presentation preferences.

Claim 23. (Currently Amended) A method for electronically trading interests, comprising: entering one or more investment criteria into a computer system in which are stored trading interests of a plurality of parties; identifying offerings of the interests from a plurality of trading parties responsive to the investment criteria; presenting, in an integrated fashion, information related to identified offerings of the plurality of trading parties; selecting an offering for which information is presented; and completing a trading order for the selected offering.

Claim 24. (Original) In a computer system for trading short term interests including a plurality of buyer terminals, a plurality of dealer and/or issuer terminals and a central computer linked to the buyer terminals and the dealer and/or issuer terminals by a communications system, the improvement comprising memory accessible by the central computer in which is stored information of specific dealers or issuers authorizing presentation of offerings information of the specific dealer or issuer on a specific buyer terminal, the computer including programming which provides offerings information only to authorized buyer terminals.

Claim 25. (Original) In a computer system for trading short term interests including a plurality of buyer terminals, a plurality of dealer and/or issuer terminals and a central computer linked to the buyer terminals and the dealer and/or issuer terminals by a

communications system, the improvement comprising memory accessible by the central computer in which is stored information of specific dealers or issuers authorizing presentation of offerings information of the specific dealer or issuer on a specific buyer terminal, and information of specific dealers or users authorizing the specific buyer terminal to execute a trade on an offering about which information is authorized to be presented on that buyer terminal, the computer including programming which provides offerings information only to authorized buyer terminals and which executes trades requested only by authorized buyer terminals.

Claim 26. (Original) In a computer system for trading short term interests including a plurality of buyer terminals, a plurality of dealer and/or issuer terminals and a central computer linked to the buyer terminals and the dealer and/or issuer terminals by a communications system, the improvement comprising memory accessible by the central computer in which is stored information of buyers authorizing presentation of offerings information of specific dealers or issuers on a respective buyer terminal, the computer including programming which provides offerings information only of authorized dealers or issuers to the respective buyer terminal.
